

# Explore the Benefits of AgroCoir

Booth #1406

**Growers throughout** North America are realizing the many surprising benefits of AgroCoir which is produced using a proprietary process. AgroCoco, the supplier of this premium quality substrate, is continually receiving multiple reports of benefits from using AgroCoir in growing media blends. Improved PHYSICAL STRUCTURE is the most reported benefit. Aeration remains high with increased resistance to excess compaction. Improved water availability provides greater water reserves for increased performance and shelf life. CHEMICALLY increased pH stability and efficiency in nutrient use are reported; this is due to

the high CEC (Cation-Exchange-Capacity) of AgroCoir. BIOLOGICAL benefits reported

include disease suppression and no apparent need for fungicides. Most growers are incorporating AgroCoir to improve moisture control, shelf life and performance in retail outlets.

AgroCoco has been serving the nursery industry since 1994 and is THE LARGEST COIR PRODUCER IN NORTH AMERICA! Explore the benefits of AgroCoir at our OFA Short Course Trade Show booth #1406! (AgroCoco 29425 Crown Ridge, Laguna Niguel, California 92677)

**OMRI**  
AgroCoir is **AgroKoir**

The Coir Packed with Plenty of **K**

High in Potassium  
Low in Nitrogen

Allows YOU to CONTROL NITROGEN LEVELS

AgroKoir Packs a Potassium Punch!

Widely Used in All Aspects of Nursery Production:

- Germination
- Propagation
- Container Production
- Premium Color Production
- Hydroponic Production
- High End Hanging Baskets

Great for: Grasses, Fruits, Vegetables, Herbs, etc.
